

THE QUIET FORCE OF CONTROL

M42 POWERMAX VS™

Product Description

Now with variable setting height

The new M42 Powermax VS blade combines a strong tooth profile with Håkansson's innovative variable setting. This unique configuration reduces vibration and noise while enhancing stability and cutting performance.

The special tooth geometry, shaped by our specialists, delivers excellent results in interrupted cuts of structural steels such as tubes, profiles and beams. It is exceptionally well-suited for bundle cutting in one or multiple layers.

Made from HSS M42 Swedish steel, Powermax VS offers outstanding durability, shock resistance and reduced risk of tooth breakage, ensuring a long service life and reliable performance cut after cut.

Proven in the field and now improved with variable setting, Powermax VS is the premium choice for professionals who demand efficiency, strength and reliability.

- Tooth set AR
- Tooth profile: PXV
- Setting height: Variable
